Kyoto-shi, Kyoto

(74) Attorney: Takeo MASUDA, patent attorney

**(57) Claims**

1. An indicator characterized in that a display part is formed by printing or other like means desired letters, figures or the like with coloring ink on the back of a transmitting plate which transmits lights, and

a base plate on which a retroreflection means having glass beads is formed is provided at the back of the transmitting plate.

2. The indicator as set forth in Claim 1, characterized in that a light source is provided between the retroreflection means and the base plate and the member carrying the retroreflection means is imparted with light transmittability.

## Brief Explanation of Drawings

Fig. 1 is a cross-sectional view showing a preferred embodiment of this utility model, Fig. 2 is its front view, Figs. 3 to 5 are cross-sectional views for explaining an example for applying a retroreflection means to glass beads, Fig. 6 is a cross-sectional view showing another example of retroreflection means, Fig. 7 is a cross-sectional view showing another embodiment, Fig. 8 is a cross-sectional view showing a known embodiment, and Fig. 9 is a cross-sectional view showing another known embodiment.

1 ..... light-transmitting plate, 2 ..... display part, 3 ..... glass beads,  
4 ..... retroreflection means, 5 ..... base plate, 9 ..... adhesive layer,  
10 ..... light source, 11 ..... back plate
